Authorization for Payment for Medical Services Outside the Clinical Center

The Clinical Center covers up to \$5,000 per patient per fiscal year for medical services that are not available at the Clinical Center, services needed while the patient is at home in-between visits to the Clinical Center, and miscellaneous or emergent expenses. The use of any outside service must be specifically outlined by the requesting investigator and authorized by the Institute Clinical Director. If the patient has insurance coverage, the Clinical Center will pay only protocol-related costs that are not covered by that insurance plan. Any charges exceeding the \$5,000 allotment will be charged to the Institute.

Instructions: Complete all of the following sections. Please specify what services are being authorized (i.e. surgical procedures, office visits, laboratory testing, ambulance transportation, etc.). In signing this authorization, you are certifying that the services are required as part of the patient's protocol. The authorization is not complete unless signed by the Clinical Director or designated Institute personnel if the Clinical Director is unavailable.
