

CELEBRATING 50 YEARS OF CLINICAL RESEARCH

Do you feel that you need the time to become confident and experienced so that you can launch your new career in a clinical specialty?

Are you interested in gaining the knowledge and experience to provide care to patients in specialty programs of care in a clinical research setting?

If you are a new graduate or will graduate from a nursing program in spring 2004 we invite you to investigate these exceptional possibilities:

➤ **Neuroscience Nurse Internship**

A seven month clinical internship programs are jointly sponsored by the National Institute of Neurological Disorders and Stroke and the NIH Clinical Center Nursing Department.

➤ **Oncology Nurse Fellowship**

A month fellowship sponsored jointly by the National Cancer Institutes and the NIH Clinical Center Nursing Department.

A combination of classroom and clinical experiences designed to expose the new nurse to the specialty area and clinical research training.

Both programs provide clinical research training including protocol implementation, roles of the research team, ethics, genetics, pain and palliative care, complementary and alternative treatments and the core curriculum for national certification.
